

Above ground operator for swing gates of up to 1.8 m per gate leaf

A concept in safety

Amico is the revolutionary solution for residential and apartment block swing gates. It provides the best in terms of active safety measures thanks to the testing it has undergone to bring it up to EU standards in matters of impact forces.

Amico

Amico is a 24Volt operator Amico is a safe, innovative operator, with an extra touch: its force is encoder controlled. Coupled with the ZL90 control panel, it makes it possible to install systems which are duly compliant with European standards as concerns the maximum impact forces generated by gate movement.

EN12445 - EN12453 compliant.

Through the ENCODER, the dedicated panel constantly controls the gate leaves' movement allowing for safe thrust, and is EU standard compliant.

Eye-catching design.

The aluminium supporting structure makes Amico extremely robust. Careful design and attention to detail, besides bestowing its exclusive look, also protect it from environmental agents.

Blackouts no more!

Amico's 24V electronics automatically detect any lack of power and activate the emergency mode which works on (accessory) batteries built-into the assembly.

The electronics

Besides the normal control and safety functions, Amico's new electronics provide certain peculiarities which allow for total control of the operator and optimisation of its functions, such as:

> Signal led

built into the control board to provide easy diagnosis of the systems functions

> End point control

through the ENCODER to easily manage movement and slow-down

> Simplified installation

through one, three-polar cable which handles the power supply and the slow-downs.

Limits to use

Gate leaf width (m)	Gate leaf weight (kg)
1	250
1,5	215
1.8	200

The range

LB90

A1824 Self-locking gearmotor

with encoder ZL90

Control panel for two-leaf swing gates.

Card for connecting two 12V – 1,2Ah emergency batteries with battery-rack.

Dimensions

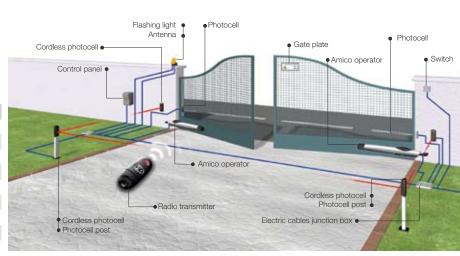

Technical features

Туре	A1824
Protection rating	IP44
Control panel power supply (V)	230 A.C. 50/60Hz
Motor power supply (V)	24 D.C.
Max current draw (A)	4
Torque (W)	100
Thrust (N)	400 ÷ 2000
Duty cycle (%)	intensive service
Opening time (90°)	adjustable
Operating temperature (°C)	-20° ÷ +55°

Standard installation

Came cancelli automatici s.p.a.

via Martiri della Libertà, 15 31030 Dosson di Casier - Treviso - Italy
